

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

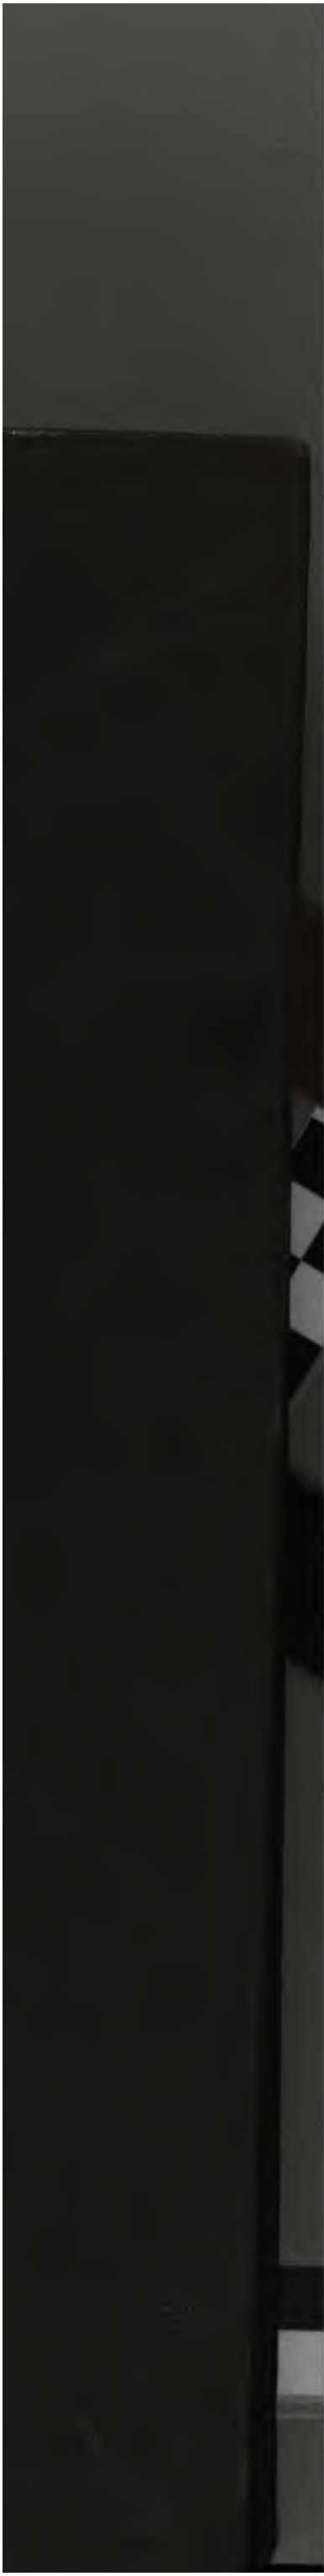

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. * Half-year to 30th June. † The expenditure from Loans has been classified in this table under the headings made use of in the Schedules to the various Loan Acts, this being the method adopted by the Treasury. Information as to the total amount actually spent under some headings of Expenditure is consequently not obtainable, certain items being included under the indefinite heading "Development of Goldfields and Mineral Resources." "Electric Telegraphs," and "Water Supply and Sewerage" are probably most affected by this classification.

* Areas of Alienated and Leased Lands.

It will be observed that under the headings provided in this Table the areas for which Returns are furnished under "The Industrial Statistics Act, 1897," fall far short of the areas under corresponding headings as disclosed by the Lands Department's Returns of Alienated and Leased Land, and the balance between the two sets of figures referred to has therefore in each case been inserted with a view to adjust such differences.

The reason why Returns relative to certain alienated and leased land are not obtained under the Industrial Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with land which remains *entirely unimproved or unstocked*, and also in a lesser degree in the fact that small holdings under one acre in extent are exempted under the provisions of the Act from supplying Returns. The Statistical Returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

† Exclusive of 80,759 acres held under Mining and other leases issued by the Department of Mines.

* Included under heading "Orchards."

† The apparent falling off in 1896-97, as regards the heading "Orchards," is to some extent explained by the fact that the acreages now separately specified under "Onions" "Other Root Crops," "Market Gardens," etc., were in previous years all included under the one heading.

‡ The acreages under "Vines and Fruit Trees" in 1896-97 and subsequent years have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard suggested by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre; a comparison between the figures of these years and those of previous years is, therefore, valueless.

|| Includes 27½ acres miscellaneous crops.

PART VII.—MINERAL STATISTICS AND WATER CONSERVATION.

No. 18.—*Ore and Minerals, other than Gold, produced in Western Australia, as reported to the Mines Department during 1903 and previous years.*

NOTE.—As the collection of statistics of minerals, other than gold, was only commenced by the Mines Department in 1899, the mineral production previous to that year has been taken from the Customs Records. See Tables 20 and 21.

* Children under the age of seven years are not criminally responsible; those who have attained that age, but are still under fourteen, are only criminally responsible if it is proved that at the time of the offence they were capable of knowing that they ought to have acted otherwise. In the above table charges have been included concerning children under seven and over fourteen. The total of 283 includes, as will be seen, 71 neglected children.

* Exclusive of cost of administration. † Up to and including 1895 the numbers given are those of the "Assisted" or State-aided Denominational Schools. By "The Assisted Schools Abolition Act, 1895," all grants-in-aid to these were abolished from the 31st December of that year. Thereafter these schools ranked as "Private schools, as distinguished from "Government" schools. The figures for 1896 and onwards include all private schools, secondary as well as primary, though one of the former (the Perth High School) is subsidised by the State. The average attendance, and consequently the percentage of attendance to enrolment, at these schools from 1896 is partly estimated, some of the returns forwarded being obviously incorrect. ‡ Not ascertained previous to 1897. § From and including 1897 the percentage of attendance to enrolment has been calculated on the basis of "average attendance" to "average enrolment."

* Bursaries of the value of Ten pounds have been offered to the girls attending the Elementary Schools for several years past. In 1895 they were extended to the Boys also.

† The examination being similar to that laid down for the High School Scholarships, one of which happened to be vacant, this Scholarship was, in place of the bursary, offered to, and accepted by, the boy who had passed; no bursary was, therefore, actually given.

‡ In 1899, one boy and one girl obtaining equal marks, the prize was divided between them. In the above table each has been credited with winning a bursary.

§ In 1899, and subsequent years, the bursaries were for boys and girls without distinction of sex.

* The monthly barometer mean readings since 1885 are taken from the 9 a.m. and 3 p.m. daily readings. Prior to that, the mean of the noon readings was used as the monthly mean. † The thermometers were moved in August, 1835, to their present position in the Botanic Gardens, and as they have apparently given a slightly lower record since then, the means have been taken from 1886 only.

PART XII.—MISCELLANEOUS.

No. 5.—Rainfall in Western Australia during 1903.

With averages (to the end of 1903) for all stations having at least five years' record. 100 Points=1 inch.
The Sign ... signifies "no rain fell." The Sign — signifies "no record."

NOTE.—The stations are grouped into districts, and these are sub-divided into square degrees, which are figured according to the latitude and longitude of the N.W. corner of each square, the first two figures representing the latitude and the last two the longitude, less 100°. Thus Perth is in the square 3115, showing that its latitude is 31° odd minutes, and its longitude 115° odd minutes. The mean rainfall for each square degree is adopted from all the stations situated in that square having complete records for 1903. The average is taken for all years up to and including 1903.
